## **Company Adryan Consultants B.V.**

Adryan Consultants is an independent consultancy services group that focuses on the biopharmaceutical and high-end food industry. It provides professionals active in the following areas: (interim) project management, compliance & validation and engineering (process and process control). We help our customers with the maintenance of their entire lifecycle of systems, equipment and facilities, in a cost-effective manner.

Adryan Consultants B.V. was founded in 2012 in Dordrecht. The founders, who are also responsible for the daily running of Adryan Consultants, have more than 20 years' experience within the Benelux as a consultancy and service provider in the pharmaceutical and high-end food industry.

Adryan Consultants has fixed staff employees and freelancers who are connected in the Adryan Consultants network. With this network Adryan Consultants is able to solve your complex problems and/or fill in your gaps regarding: compliance, process, production, tech-transfer, design, engineering, construction, commissioning, qualification and start-up.

Our organization is NEN4400 certified and currently (among others) we cooperate with and serve the following clients and projects:

- MSD , Haarlem and Oss
- Astellas , Meppel
- Pfizer , Puurs
- Abbott , Olst
- Sanquin, Amsterdam
- Aspen, Oss
- Janssen Biologics, Leiden
- Synthon , Nijmegen
- FrieslandCampina , Borculo and Bedum
- Boehringer Ingelheim , Weesp
- TEVA , Haarlem
- Nutricia, Zoetemeer
- BBIO, Bilthoven
- Pharming, Leiden

Serving the needs and requirements of our clients to their highest satisfaction is our main concern. Our success lies in working with highly trained experts with extensive experience in their field.

## Adryan Consultants team

80 senior- engineers, consultants and projectmanagers are directly employed. Through the years Adryan Consultants has invested in several partnerships to create a network of pharmaceutical/high-end food engineers and consultants which can be contracted for complex and difficult projects.

## Our services

<b>Managers</b>	For management of projects, EPC, Tech-Transfers, CQV/start-up, construction; for line-management (interim);
<b>Sr. Engineers</b>	To set up complete process from scratch, generating the PFD's and business cases; From upstream to downstream, up to filling to and to warehousing; For modifications/improvements on existing production-equipment and/or utility systems;
<b>Sr. C&amp;Q Engineers</b>	For ICV (integrated commissioning and validation) projects;
<b>Sr. Consultants</b>	For review, auditing and advise based on their competences and experiences.

## Adryan Consultants added value

1. Experience = team with proven track record;
2. Our company structure and culture promotes efficient team project delivery;
3. Members of our staff and project team have walked in our clients' shoes as engineers, operators and managers in their former lives at operating companies;
4. Adryan Consultants places the highest priority on client satisfaction;
5. To achieve the high success rate that we enjoy Adryan Consultants relies on excellent communication with our clients and an ability to identify and focus on core project requirements .
